

Real Estate Market Review

East Bay Industrial

The inner East Bay remains a hotbed of industrial activity, as strong demand and cycle-high construction levels signal the continued strength of the market. Even after several givebacks produced 435,980 square feet of negative net absorption, the area's vacancy rate is just 2.9%, and warehouse properties were even tighter at 2.3%. Rental rates in the East Bay continue to rise, reaching an average of \$1.04/sf NNN for all product types, and \$0.90-\$1.00/sf NNN for bulk warehouses. Developers have responded to the imbalance between demand and supply, with more than 1.6 million square feet of future industrial space being built at quarter's end, resulting in a brief uptick in availabilities. Leasing activity and absorption are likely to trend upward in the coming periods, as users satisfy their need for space along the logistically superior I-880 corridor.

Despite 435,980 square feet of negative net absorption this quarter, the East Bay industrial market has gained 286,619 square feet of occupied space in the year to date and has seen positive absorption in eight of the last 10 quarters. Most of this quarter's new vacancies stemmed from spaces listed for sublease after companies relocated, bringing sublease availability to 1.08 million square feet, its highest point since the end of 2014. A high volume

of industrial tenants in the market suggests that those spaces will be backfilled quickly, as direct availability in existing buildings remains at or near cycle lows around the East Bay. The soaring demand coupled with slowly increasing supply continues to push rental rates upward, to an average of \$1.04/sf for all product types. Bulk industrial spaces range from \$0.90-\$1.00/sf NNN, depending on features and proximity to I-880, while flex product is leasing

Market Forecast Trends

for \$1.60-\$1.70/sf NNN. Among the core industrial submarkets, San Leandro/San Lorenzo is the most affordable, with an average asking rate of \$0.69/sf NNN.

Leasing activity relaxed during the third quarter, to a total of 66 transactions covering 969,408 square feet, due to the typical summertime slowdown and a lack of a desirable bulk-space availabilities. The period's largest deal was a sublease, signed by an unknown tenant at 1501 Doolittle Drive in San Leandro, where the new user will take over 92,986 square feet in the coming months. In the biggest direct lease of the quarter, the nuclear energy and engineering company Kairos Power took 55,757 square feet of flex/R&D space at 707 W Tower Avenue in Alameda. Finally, ARGOS Metal Distribution signed on for 40,820 square feet in the Decoto Industrial Park at 34015 7th Street in Union City. As upcoming construction deliveries add sorely needed supply to the inner East Bay market, we anticipate an increase in lease transactions in the coming quarters.

Fifty-two East Bay industrial assets changed hands in the third quarter, totaling nearly 1.36 million square feet and \$140 million in dollar volume, for an average price tag of \$157 per square foot. Investment activity has recently been confined to smaller buildings, but the inner East Bay continues to attract buyers from around California and beyond. Illinois-based Center Point Properties Trust made the quarter's biggest investment play, acquiring 2230-2242 Davis Court in Hayward, a 142,372 square

foot warehouse, for \$14.65 million or \$103 per square foot. The seller, owner/user Kortick Manufacturing, will briefly lease back a portion of the property, which Center Point intends to renovate and reposition. Two other notable transactions this quarter involved Roadstar Trucking. The Hayward-based company sold its former 64,458 square foot building at 30527-30537 San Antonio Avenue to Lippow Development Company, and is expanding into 78,860 square feet down the street at 30489-30509 San Antonio Avenue. Both properties sold for approximately \$108 per square foot.

No industrial buildings were delivered during the third quarter, keeping the year's new supply at two buildings totaling 202,758 square feet. A cycle-high 1,613,731 square feet of future industrial space was under construction at quarter's end, and approximately 79% of that space was available for lease. The largest future availability is the 707,596 square foot Bay Area Logistics Center at 2995 Atlas Road in Richmond, where LDK Capital is anticipating delivery in the first quarter of 2018. Prologis is behind the East Bay's second-largest speculative project, the Northeast Gateway building at 277 Maritime Street in Oakland, which will add 256,136 square feet to that city's industrial stock by the end of the year. Finally, Building 1 of Conor Commercial's Hayward 92 Industrial Center at 3596 Baumberg Avenue, a 333,365 square foot warehouse fully preleased to FedEx, is expected to be ready for occupancy during the fourth quarter.
