

Gas Powered Games

Project Outline

This tenant improvement was completed to accommodate a software game company in a 26,113 square foot space in a two-story office building in Redmond, WA. This project required a very budget-sensitive design effort within a tight completion schedule.

Scope

GVA Kidder Mathews reviewed and commented on lease documents, performed a request for proposal (RFP) for construction services, cabling and furniture, managed the day-to-day construction process, cost management efforts, weekly client/design team meetings and all liaison responsibilities with the landlord.
